## **1. Synergetic Neural and Fascial Pathways - 12 CE Hours – November 6 & 7, 2026**

**Course Overview:** This course explores the dynamic interplay between the fascial network and the nervous system — how they communicate, compensate, and co-regulate movement, posture, and pain. Through the Synergetic Myofascial Method, students will learn manual and energetic approaches to unwind tension in both systems while improving body awareness, mobility, and resilience. This is ideal for practitioners ready to work beyond the muscular layer and into the integrated architecture of nerves, fascia, and energy.

**Goal:** To provide bodyworkers with practical tools and embodied understanding to assess, unwind, and reintegrate the neck, pelvis, spine, feet and upper body using Synergetic Fascial Neural principles. The course integrates anatomical, functional, and energetic approaches to restore stability, mobility, and fascial and energetic flow from the head down.
